

INDUSTRY-ACADEMIA FORUM
TO UNCOVER THE POTENTIAL OF
EMERGING ENABLING TECHNOLOGIES

Online Workshop on Research and Innovation (R&I) regional & national initiatives

Funded by the European Union

Online Workshop on R&I regional & national initiatives Emerging Technologies For Good: National initiatives in Europe

May 14, 2024, 10:00 am CEST – 11:30 am CEST, online

#EmergingTechnologies #Innovation #AI #Digitalisation #EnergyEfficiency
#SmartMaterials #Cybersecurity #DigitalTwins #StakeholderEngagement

What is it?

- Online interactive workshop organised by the FORGING project.
- Focuses on Emerging Technologies (ET) at Member State level, Regional and EU initiatives, R&I programmes.

When is it?

- 14 May 2024 from 10:00 am to 11:30 am (CEST)

Are there any registration fees?

- This event is free, but registration is mandatory

Who shall attend?

- Stakeholders involved in technology innovation funded programmes, representatives of regional- national bodies, decision makers in charge of innovation programmes, academics and researchers

Why participate?

- **Raise awareness** about existing projects in Member State
- **Get new knowledge** on initiatives related to Emerging Technologies and the best practices associated
- **Interact** and share experience

Agenda

Timing (CEST)	Items	Speakers
10h-10h05	Introduction to the workshop	Eva Fadil (GAC)
10h05-10h10	Presentation of FORGING	Barbara Bento (GAC)
10h10-11h	National initiatives representing technology approaches throughout Europe	Solja Sulkunen (Finland, FAIR project) Cecilia Warrol (Sweden, Produktion2030 project) Cristina Ramos (Spain, Digital Catalan Alliance (DCA)) Matteo Laffranchi (Italy, RAISE project)
11h-11h10	European approach : foresight on emerging technologies and Industry 5.0	João Farinha (Joint Research Center (JRC))
11h10-11h25	Moderated interactive discussion	All
11h25-11h30	Wrap up and upcoming FORGING activities	GAC

About FORGING:

FORGING is an initiative funded by the European Union's Horizon programme. The overall objective of the **"Forum for emerging enabling technologies, in support of the Digital and Green Transitions through value sensitive innovations"** (FORGING) project is to develop new technological visions and pathways, placing the human being, society, and environment at the centre, in line with the industry 5.0 framework. By using a new methodology, the project assists the growth and manifestation of emerging technologies from early stages on and accelerate their uptake by industry and society.

In FORGING, we organise co-creation workshops in order to engage with experts, who have a better understanding and knowledge of the emerging technologies' potential. These workshops explore the societal impact and the implications of those novel technologies. To support this, the project builds on 6 technology framework that will be tackled in co-creation activities involving experts from the FORGING Forum, a European expert community.
